

# RECALL IPA FOR OXE®

ACTIVE CALL RECORDING FOR  
IP ALCATEL OXE® EXTENSIONS

The ability to record interactions with customers by telephone is becoming essential in more and more organizations, not only to comply with current legislation and codes of conduct, but also to optimize the management of transaction data. Once the recording has been made it is then extremely important to locate it quickly and easily, that it is of high quality and may be encrypted, and that the recording is protected against unauthorized access.

## WHAT IS RECALL IPA FOR OXE®

**Recall IPA FOR OXE®** is a professional telephone call recording and storage system specially designed for IP ALCATEL OXE® extensions. It is a reliable and scalable solution that allows also real-time call monitoring and listening. Permanent and selective call recording are available according to a series of programmable filters, as well as on-demand recording from user workstations.

**Recall IPA FOR OXE®** is supplied with an intuitive management software which allows the search and playback of recordings in local mode or remotely via web, and to enter comments or assign categories during the conversation or afterwards.

## APPLICATIONS

Public safety and emergencies.  
Debt collection, banks, and insurance companies.  
Hotline and Technical support.  
Call-centers and Telemarketing.  
Order processing, reservation centers, and logistics.  
Customer-care centers.

## SECURITY AND ACCESS LEVELS

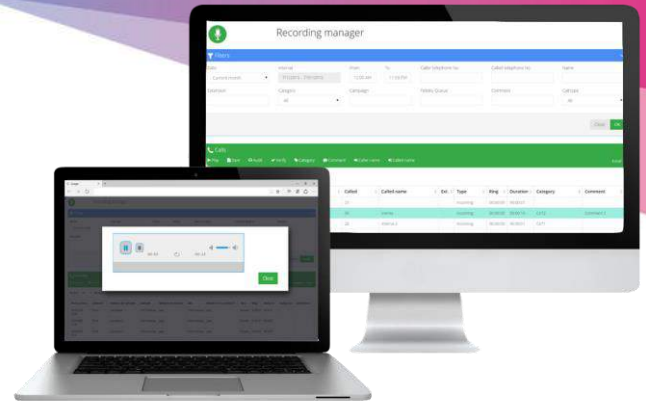

### Data integrity and protection

According to user profiles, critical operations may be enabled or disabled, for example: listening to recordings of other extensions, erase recordings or sending recordings by email. Audio files may be encrypted (**AES256**) and a digital watermark may be inserted to ensure recording integrity. Recall IPA FOR OXE® is compliant with **Payment Card Industry standards (PCI)**. The system administrator may check at any time who accessed any of the recordings.

## CATEGORIZATION OF RECORDINGS

### Labeling according to categories and comments

Audio files may be tagged according to any of the previously defined **categories**, or by adding a free text related with the contents of the conversation (sale, complaint, etc.). Categories may be used for searching recordings.

## SEARCH AND RECORDING CRITERIA

### Easy and intuitive search of recordings

Recall IPA FOR OXE® offers different criteria for programming selective recordings and allows start-stop manual recording from a software application (**Recall View One\***).

Search criteria: Extension, date and time, phone number, call type, name, category and call duration.

## STORAGE

### SQL data base – Multiple audio formats

Call details are stored in an SQL Express database. The audio is compressed and stored in standard **.wav, True Speech, or MP3 files**, standard or encrypted (up to 250 Hours/Gb). Optionally, recordings may be integrated with existing customer **CRM software**.

TECHNICAL REQUIREMENTS	
Hardware	Dual Core or equivalent (3GHz), 8Gb RAM Hard Disk 1 Tb 1 LAN Port
PBX	ALCATEL OXE® with IP DR-Link license IP Alcatel Phones
